e-Commerce

Your bank on the internet

Learn to handle your digital payment services with your mobile phone

What type of mobile phone do you have?

Apple iPhone

Samsung, Sony, Huawei, LG etc.

iOS - install Apple ID account

Android - install Google account

<u>BankID</u>

Keep this in mind when you use your BankID

Download your bank's app to your mobile phone iOS > App Store Android > Google Play Mobile BankID Install Mobile BankID Swish Install Swish Video - install and activate Swish with different banks QR codes Swish QR codes Contactless payments Cash and the future

Here is how you can protect your information

### What are digital payment services?

These could be services you use when you:

- Shop online, which is called e-commerce
- Use your bank's online services
- Transfer money via Swish, for example, on your mobile phone
- Verify your identity with BankID

### Card payments

It is common in Sweden to pay for purchases with a debit or credit card.

- The card is verified in stores through data communication with the bank, which is called authorization.
- You approve the payment with a PIN code. Occasionally you may sign a receipt instead.
- The salesperson/store may not charge an additional fee for paying with a card.

### e-Commerce

E-commerce refers to electronic (digital) commerce and is when a company or consumer sells, buys or exchanges a product online. The payment can be made in several ways:

- debit or credit card
- cash on delivery invoice
- direct transfer to bank
- PayPal
- Swish

### Your bank on the internet

To take care of banking tasks online, you must have a Swedish bank account with one of the banks in the list at right. You can then use your bank's online services to do banking tasks on your computer and in your mobile phone.

Here are some examples of online banking services:

- Access information about your accounts and loans.
- Make transfers to your own or others' accounts, even to other banks and abroad.
- Pay bills using bankgiro, plusgiro and e-giro.
- Trade securities and buy and sell funds.

#### • Danske Bank

- Forex Bank
- Handelsbanken
- ICA Banken
- Länsförsäkringar
- Nordea
- SEB
- Skandia
- Sparbanken Syd
- Swedbank
- Ålandsbanken

## Learn to handle your digital payment services with your mobile phone

The services function quite similarly, but differ somewhat depending on whether you have an iPhone (Apple) or an Android (Huawei, Sony, Samsung etc.).

Read more and make your choice on the next page.

### What type of mobile phone do you have?

### Apple iPhone

#### Samsung, Sony, Huawei, LG etc.

### BankID

BankID is a Swedish e-identification.It functions as personal identification and a digital signature online, and is thus the equivalent of yourID card or driving license.

There are three kinds of BankID:

BankID on file via your bank's online services

- BankID on card with security token
- Mobile BankID is an app that you download to your phone via the App Store or Google Play

BankID is used not only for banking, but also to identify yourself with various agencies.

You also need Mobile BankID if you want to use mobile payment services like Swish.

Read more about how to install mobile BankID on page 44.

### Keep this in mind when you use your BankID

- Protect your login information and codes. BankID is as important as a physical identification document.
- Always check which service you are logging in to it should say at the top of the BankID app.
- Also carefully check what you are signing for in your BankID app.
- Never log someone else in with your BankID.

![](_page_22_Picture_7.jpeg)

![](_page_22_Picture_8.jpeg)

### Download your bank's app to your mobile phone

These banks issue a BankID and have mobile apps:

- Danske Bank
- Forex Bank
- Handelsbanken
- ICA Banken
- Länsförsäkringar
- Nordea
- SEB
- Skandia
- Sparbanken Syd
- Swedbank
- Ålandsbanken

Here, you will need a security token. If you do not already have one, get one from your bank. Search for your bank app in the App Store or Google Play. Download and install the app using your Apple ID or Google account.

In our example, we use the Nordea bank app. The process may vary between different banks, but largely follows the same structure.

Follow the instructions for your respective mobile phone:

### Mobile BankID

**BankID** 

With Mobile BankID, you can easily identify yourself and provide electronic signatures to various banks, agencies and organisations.

You get a Mobile BankID with**your BankID app**, which you download via your bank's online services. It works the same way no matter which mobile phone you have.

![](_page_32_Picture_5.jpeg)

![](_page_32_Picture_6.jpeg)

![](_page_32_Picture_7.jpeg)

### Install Mobile BankID

![](_page_33_Figure_2.jpeg)

Log in to your bank's online services and request Mobile BankID. Then tap "Get BankID".

Enter your personal identity number and activation code, which you have received from your bank online. Choose an identification code with at least 6 numbers. You will use this code every time you identify yourself using BankID.

Test your Mobile BankID.

![](_page_33_Picture_7.jpeg)

### Swish

swish

With the Swish mobile app, you can both send and receive money. You sign for your payments using your BankID.

Swish is free for individuals, while companies must pay a fee. Swish currently has over 6 million users in Sweden.

Google Play

When you use Swish, you can track your payments in the app and on your connected bank account.

![](_page_34_Picture_7.jpeg)

![](_page_34_Picture_8.jpeg)

![](_page_34_Picture_9.jpeg)

### Install Swish

#### To use Swish, you must have a bank account with one of these banks:

- Danske Bank
- Handelsbanken
- ICA Banken
- Länsförsäkringar Bank
- Nordea
- SEB
- Skandiabanken
- Sparbankerna
- Swedbank

#### You need:

- Computer with internet connection
- Mobile phone (smartphone)
- Bank with online services
- Account at App Store or Google Play
- BankID

#### Here's what to do:

- 1. Log in to your bank
- 2. Connect to Swish by entering your phone number
- 3. Enter the one-time code you receive via text message
- 4. Go back to Swish to activate the account

![](_page_35_Picture_23.jpeg)

**TIPS:** You may choose to watch the instructional video on the next page or continue to follow the instructions on the page after that.

![](_page_35_Picture_25.jpeg)

![](_page_35_Picture_26.jpeg)

Pay: Enter the recipient's mobile phone number. Enter the sum under the amount, a message if you like, and tap "Pay".

![](_page_40_Picture_3.jpeg)

You will be sent back to the Swish app, where you will see that the payment is complete.

![](_page_40_Picture_5.jpeg)

![](_page_40_Picture_6.jpeg)

### QR codes

![](_page_41_Picture_2.jpeg)

With a QR or barcode reader on your phone, you can quickly and easily access information via text, sound, video or image directly on your phone.

You can also use QR codes to pay bills or make a payment via Swish, for example.

![](_page_41_Picture_5.jpeg)

![](_page_41_Picture_6.jpeg)

![](_page_41_Figure_7.jpeg)

5 You will now automatically be led to the site to which the QR code is linked, for example a website or video. If the code is linked to an app, you will go directly to the App Store or Google Play.

![](_page_41_Picture_9.jpeg)

### Swish QR codes

You can easily pay your invoices using Swish QR codes.

- Open the Swish app, click the QR icon at the top right and choose "scan code". When you focus your mobile phone camera on the QR code on the invoice, all of the information will automatically be filled in.
- 2

Then approve the payment with your Mobile BankID – paid and done.

![](_page_42_Picture_6.jpeg)

Swish can read QR codes if you let the app access the camera. Tap "Allow". Swish can be used to read a payment code (QR code) which is approved with your BankID.

![](_page_42_Picture_9.jpeg)

### Contactless payments

Contactless cards and apps are an alternative to cash and a smart solution for small sums.

The customer simply has to hold the card or mobile phone over the payment terminal

to pay (this is called "blipping").

Newer payment cards have the blip function automatically, but a special app is needed for this to work directly with a mobile phone.

![](_page_43_Picture_8.jpeg)

### Cash and the future

In Sweden, we are using less and less cash. Card payments and payment services like Swish are developing rapidly, while fewer banks, restaurants and so on are accepting cash. This development in Sweden is unique and it is important for the digital payment system to be simple and accessible to everyone.

But what happens if there is a crisis and suddenly we can no longer use digital payments? We cannot manage entirely without cash. According to the Swedish Civil Contingencies Agency (MSB), cash is part of our crisis preparedness.

# Here is how you can protect your information

#### Police guidelines

Never use your security token or BankID because someone has contacted you and asked you to do so. No serious player would ask you for this over the phone. Cases of fraud via fake phone calls are sharply increasing and many people are losing money because they are tricked into giving out their card information and codes, or into logging into their bank. Keep your BankID security app up to date through the App Store or Google Play. Updates mean you may receive a warning message in the app of suspected fraud, if several simultaneous log-in attempts occur.

![](_page_45_Picture_6.jpeg)

# Thank you!

Thank you for reading these instructions. Remember to go back and read them again if anything is unclear. You can also talk to your bank or the Swedish Tax Agency if you have any questions.

Good luck with your digital payment services!
